Experience

Ads Next | Baltimore, MD February 2018 – Present
Frontend Developer

- Utilize my proficiencies in HTML5, CSS/Sass, JavaScript, jQuery and PHP to develop, test, deploy and maintain websites, user interface elements, Wordpress themes and plugins, and custom client-side applications for more than 175 marketing agency clients.
- Designed and developed a React application for internal use that uses API requests to collect and tabulate real-time data about client websites
- Developed a location finder app for clients with multiple locations in vanilla JS, leveraging the Google Maps & Geocoding JavaScript APIs
- Adhered to industry standard best practices for responsive & ADA compliant web development
- Joined the team working on upgrading the company's .NET-based data dashboard in Dec. 2018

Boost Alpha | Chicago, IL (working remotely) April 2012 – December 2017
Web Developer & SEO Strategist

- Web technologist for a marketing and web design agency fulfilling 50/50 web development and SEO strategy duties including campaigns for Credit.com, Vivint, DirecTV, ADT, and others
- Responsible for building 60+ websites and landing pages for small business clients using HTML, CSS, Photoshop, JavaScript/jQuery, PHP/Wordpress

Condé Nast Publications | New York, NY December 2007 – April 2012
Content Manager & Photo Retoucher

- Responsible for optimization and delivery of 12,000 image and text assets per month to Condé Nast international magazine franchises
- Honed Photoshop and Adobe Creative Suite skills as the main point of contact for images and InDesign files being delivered to 20+ countries via FTP under tight deadlines
- Used Photoshop to retouch and edit an average of 1200 raw image files per week under deadline for delivery to Condé Nast print and online publications and the Vogue Archive
